

What We Do

We help small and medium sized businesses gain insights and take action to improve and determine “what now?”

Business Insights and Reporting - Not sure whether your business is on track? We'll analyze your data, gain insights and help you take action.

Technology Planning and Implementation - Have a love/hate relationship with technology? Let us look at your software suite, make recommendations and reduce your frustration.

Process Improvement - Want to do something faster or better? We can evaluate what you're doing, make recommendations for improvement and help you put the changes in place.

People Management - Would you like better practices for hiring and optimizing staff performance? We'll look at your pain points and address goals with specific recommendations.

About Us

My passion is seeing businesses thrive and grow. As a small business owner myself, I diligently apply the expertise I gained from being a leader and strategist in Marketing and Technology for 15 years to help other business owners see opportunities and act on them to succeed.
